TECHNICAL PROJECTS

Active Directory Enterprise Home Lab | Windows Server, Active Directory, DNS, Hyper-V
- Built a virtualized Windows Server domain environment to simulate core IT infrastructure for a small organization.
- Installed and configured Active Directory Domain Services (AD DS) and DNS on a Windows Server domain controller.
- Designed an organizational unit structure for departments, users, servers, and security groups to practice scalable identity administration.
- Documented configurations and troubleshooting steps, creating a repeatable reference for future lab expansion and issue resolution.

EXPERIENCE

Arkansas Army National Guard - Arkansas
Signal Support Systems Specialist (25U) | Oct 2023 - Present
- Reduced communications setup and teardown time by approximately 30% by establishing standardized setup, teardown, and equipment-placement plans.
- Install, configure, operate, and troubleshoot communications, networking, and information systems in field and operational environments.
- Diagnose hardware, software, network-connectivity, and system-access issues to restore equipment and user functionality during time-sensitive operations.
- Configure and maintain network switches, tactical communications equipment, radios, and computer-based systems while maintaining accountability of sensitive equipment.

Jose's Mexican Grill - Arkansas
Server | Aug 2025 - Present
- Manage multiple tables and competing priorities in a fast-paced environment while maintaining accurate orders, transactions, and responsive customer service.
- Resolve customer concerns and coordinate with coworkers in English and Spanish to keep service moving efficiently during high-volume periods.

Merchants Wholesale - Arkansas
Warehouse Worker / Delivery Driver | Jan 2025 - Aug 2025
- Prepared, organized, and delivered customer orders while maintaining inventory accuracy, meeting delivery schedules, and resolving routine logistical issues independently.

ADDITIONAL

Languages: English and Spanish (bilingual)
